DETAILED ACTION

This office action is responsive to amendment filed 2/14/07. Claims 1-4, 8-16, 18-23, 25 28 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claim 28 is rejected under 35 U.S.C. 102(e) as being anticipated by Bradski (US 2004/0027330).

Bradski discloses a motion controlled handheld device (mobile device 104 as shown in Fig. 1) comprising: a first accelerometer operable to detect acceleration along a first axis; a second accelerometer operable to detect acceleration along a second axis, the second axis perpendicular to the first axis; a tile detection component operable to detect rotation having a component around at least one of the first axis and the second axis (see [0052]); the tilt detection component comprising a camera (602 in Fig. 6, 704 in Fig. 7) operable to generate a video stream, and a video analysis module operable to detect a direction of motion based on the video stream ([0062]-[0063]);

a display operable to present a current image (e.g., 106 in Fig. 1B; 108 in Fig. 1C); a motion tracking module operable to track motion of the device in three dimensions using the first accelerometer, the second accelerometer, and the tilt detection component ([0052]); and

Application/Control Number: 10/807,569

Art Unit: 2629

a controller operable to generate the current image and to modify the current image in response to the motion of the device (it is inherent the device of Bradski has a controller so as to control the displayed images as shown in Figs. 1-7).

In addition, Fig. 6 of Bradski teaches using a camera for providing images of the mobile device including the markings, the images is processed (video stream), by identify the makings to provide the relative and/or absolute location and orientation of the mobile device, then using the processed information (video stream), the mobile device is capable of displaying different views of the virtual space or object, which reads on a range finder (camera) to determine distance information including a distance between the device and an object of the video stream, and the video analysis module is operable to determine a magnitude of translation of the device using the distance as claimed.

Allowable Subject Matter

4. Claims 1-4, 8-16, 18-23, 25-27 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claim 28 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's remarks regarding Bradski are not persuasive. Bradski teaches using a camera for providing images of the mobile device including the markings, the images is processed (video stream), by identify the makings to provide the relative and/or absolute location and orientation of the mobile device, this reads on the range finder as claimed.

Art Unit: 2629

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina Liang whose telephone number is (571) 272-7693. The examiner can normally be reached on Monday-Friday from 8AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (571) 272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
